

Amendments to the Specification:

On page 16, please replace the paragraph beginning at line 1 with the following amended paragraph:

A/
—The television listing controls shown in Fig. 7 include a “change day” control 702, an EPG “search” control 704, and a “stay on channel” control 706. The “change day” control 702 allows the user to change the day of the program grid being shown by the EPG. The EPG “search” control 704 provides access to a mechanism to search EPG listings for a particular program or programs. The “stay on channel” control 706 comprises a toggle control to activate/deactivate this option. When the option is deactivated, then the TV tuner actively tunes to the selected channel in the program grid of the EPG. When the option is activated, then the TV tuner remains on the channel that was being displayed before entering the EPG.--
